

Armored Tensile-Resistant Fiber Optic Patch Cord

Overview

An armored fiber optic patch cable is a specialized type that includes a protective “armor” sheath made of spiral stainless steel around the fiber. This innovative design makes it highly suitable for server rooms and various harsh environments. The industrial armored cable features strong tensile strength, strong pressure and rodents resistance, and good flexibility characteristics. Compared to regular fiber patch cables, the armored. Fibertronics, Inc. The patch cords provide sturdy. Armored Fiber Patch Cords (Armored fiber patch cables) that provide stronger protection of the optical fibers to support fiber optic cabling in the most harsh environments This Type fiber patch cable use rugged shell with aluminum armor and kevlar inside the jacket, and it is 10 times stronger than. Corning's Armoured Patch Cords exhibit the same outstanding performance as the standard patch cords.
