

Austrian Cloud AI Server

Overview

Launching in August 2025, the local cloud region will consist of three datacenters around Vienna, offering businesses and the public administration access to advanced cloud and AI technologies while providing secure, data-compliant storage within Austria. The safest path for many workloads is using fully Austrian-owned providers operating Austrian data centers under Austrian jurisdiction, without foreign parent-company control. Data centers (Austria): Vienna (DATASIX), Klagenfurt, and Graz. ANEXIA also operates internationally, therefore. Microsoft, together with State Secretary Alexander Pröll, is opening a datacenter region in Austria. Their expertise in these areas, combined with a focus on cybersecurity and network services, highlights their commitment to enhancing operational. What cloud services from Austria do we offer?

Your own cloud – completely managed from Timewarp and flexibly scalable. Ideal for companies with 100+ users who want to outsource their entire IT to the cloud. The cost efficient solution with pay per use billing. Get AI models and tools such as DeepSeek or Ollama running on our dedicated GPU servers and tag us on Hugging Face for a shout-out of your favorite Projects.
