

Chain for lowering the optical cable

Overview

The downlead clamps support the OPGW (optical ground wires) from the upper part of the tower to the splice box. With proper installation of the downlead clamps, it offers sufficient strength and spacing without destroying the cable. At any time, “Protecting cables and hoses” is our first consideration when designing cable chains. Thanks to modern materials and designs, cable chains are now capable of achieving true peak performance, enabling considerable. On this page, you will find out what exactly is meant by a cable chain, when it is used, which materials are available for cable chains, what arrangement and assembly options are available, and last but not least what you need to keep in mind when selecting the appropriate cables. The clamp can establish a massive cable range owing to its. Discover cable rollers for overlash construction and aerial work.
