

Cost of laying single-mode four-core optical fiber

Overview

Single-mode fiber cables are designed for long-distance, higher bandwidth applications using light signals of a single frequency. expect to pay around \$2-\$6 per foot for quality. Among the various configurations available, the 4 core single mode fiber optic cable stands out as a balanced solution—offering sufficient capacity for medium-scale networks without the complexity and cost of higher-core-count cables. With prices ranging from \$1 to over \$ 50 per linear foot, depending on the installation method, understanding these costs helps make informed decisions about this essential connectivity investment. While multimode is more expensive, the total. Whether you need singlemode, armored, or indoor plenum, this guide gives you the exact cost per foot of fiber optic cable — including installation — so you can budget without guesswork. Data aggregated from Q1 2026 contractor invoices across Texas, Ohio, and North Carolina.
