

Electrostatic stickers on distribution boxes

Overview

ESD labels are essential for any packaging used to move static-sensitive devices. These stickers clearly show which items need careful handling, following EN61340-5-1 standards. Antistat offers a wide range of caution. Check each product page for other buying options. A typical example is the shock of touching a metal object after walking across a carpet. While this might be a minor inconvenience in everyday life, it can lead to significant damage in. Uline stocks a wide selection of Anti-Static Labels. Huge Catalog! Over 45,000 products in stock. The Polyonics® family of ESD-Safe polyimide and polyester label materials are designed to help protect your most sensitive devices from electrostatic charges arising from both human contact (HBM) and charged devices (CDM). They provide durable static dissipative top surfaces and feature low. Electrostatic discharge (ESD) is a significant risk in electronics manufacturing, potentially causing damage to sensitive devices. Why Choose Custom ESD Labels.
