

Fiber optic sensor FS-V11P

Overview

The Keyence FS-V11P is a digital fiber optic sensor amplifier designed for high-precision detection in industrial automation systems. It offers stable sensing performance, fast response time, and easy setup, making it suitable for object detection, positioning, and inspection. FS-V11P, Fiber Amplifier, Cable Type, Main Unit, PNP in FS-V10 series by KEYENCE America. Designed as a main unit with a cable-type connection, this amplifier supports PNP output, making it compatible with a wide range of uses only and may not be included. Ambient temperature varies with the conditions below. It's designed to work with various fiber optic cables and can be easily set up and calibrated with a range of options for sensitivity. The Keyence FS-V11 (P)/12 (P)/10 Series Hybrid Fiberoptic Sensors feature an operation indicator, a bar graph LED monitor, and a digital LED monitor.
