

Fireproof corner protector for cable trays

Overview

Firestop pillows, plugs, sheets, and wraps fit around ducts, cable trays, and pipe openings in walls, ceilings, and floors to prevent fire from moving to an adjoining space. They're often used with fire barrier caulks and putties to complete the seal. These systems prevent fire and smoke from spreading through open cable pathways, maintaining circuit integrity and code. Effective protection of cable systems around the world: our tried-and-tested FLAMMOTECT-A and DG-CR 0.7 products are successfully used to protect cables in high-rise buildings, industrial buildings, and offshore facilities as well as in sensitive areas, such as hospitals, airports, production. 3M Fire Barrier Moldable Putty+ is a one-part, halogen-free product designed to firestop electrical outlet boxes and a wide variety of through-penetrations including cable, conduit, insulated pipe and metal pipe, which penetrate fire-rated construction. TTG eliminates the need for firestop sealants or sprays by firestopping as the wall is constructed.

Article Content

EZPATH | Legrand Data Center Solutions

The product's innovative design provides a safe and reliable pathway for cables and other vital equipment to pass through fire-rated walls and floors. With its easy

Instrument FireMaster® fire protection cable tray

The FireMaster® cable tray wrap system provides 30 minutes hydrocarbon fire protection to cable trays carrying control cable wiring. The FireMaster® cable tray wrap consists of FireMaster® Marine Plus

LAF Group | Fire Stopping System for Cables and Cable Trays

Trimesh®-Vermitek®-Vermiduct® is an injectable mortar-based fire stopping system that provides unprecedented levels of fire stopping power up to 4-hour fire resistance level, in compliance with

Fire protection for cables & cable trays | Flamro

With our fire protection for cable systems, we ensure that your lines meet the highest safety standards and are reliably protected in the event of an emergency.

EZ-Path Cable Tray Retrofit Device

Ideal for retrofit environments, the EZ Path Cable Tray Retrofit Device ensures safe, efficient, and reliable fire protection without disrupting active cable systems.
