

Galvanized cable tray thread rods

Overview

Galvanized Threaded Rods are long, straight metal rods fully threaded along their length. Designed for structural integrity and durability, these rods are coated with a hot-dip galvanized (HDG) zinc layer, providing long-term protection against rust, corrosion, and environmental. We are leading manufacturer of high-strength threaded rods, engineered for exceptional versatility across multiple industries.

Threaded rods combine linear and rotational movement to create. Measure your pipe and fittings to identify their pipe size, thread size, schedule, and thread type. Then, find compatible components. Made of galvanized steel, this Schedule 40 pipe has fair corrosion resistance and is designed for low-pressure applications. A plastic sleeve prevents destructive.
