

High and Low Voltage Complete Set of Equipment 10kV

Overview

The complete set of 10kV post-mounted transformer is a complete set of electrical equipment designed, developed and produced by Hechong Technology, 10kV transformer and low-voltage integrated distribution box (JP cabinet), outsourced fuse, lightning arrester, iron accessories . The complete set of 10kV post-mounted transformer is a complete set of electrical equipment designed, developed and produced by Hechong Technology, 10kV transformer and low-voltage integrated distribution box (JP cabinet), outsourced fuse, lightning arrester, iron accessories . Function: Vacuum switches are designed to control high-voltage current flow by quickly and safely disconnecting or connecting an electrical circuit in the event of a fault. They are commonly used in electrical networks and industrial installations requiring high voltage and reliable protection. It is suitable for the three-phase AC 50 Hz, rated voltage of 3. 2, 12 KV indoor high-voltage power distribution equipment. Zhengrui Electric Power Group provides advanced high and low voltage complete sets of equipment to ensure safe, efficient and intelligent power control in different application fields. It is also very convenient to install and can provide stable performance output.
