

# Huawei s New Fiber Distribution Box

## Overview

The HUAWEI IFDN (Indoor Fibre Distribution Network) Products include three fibre splitters and a small, thin access terminal box (ATB) that provide a fast and reliable fibre connection for indoor networks. With Huawei's core concept for ODN construction centering on full and dense coverage coupled with short and easy access, Huawei's ODN 3.0 is the earliest FTTH solution. ODN 1.0 optical splitting was used for. □□ Huawei ODN 3.0 – Next-Generation Fiber Deployment with Hub & Sub Boxes As global demand for FTTH networks grows rapidly, operators face challenges of high deployment costs, long rollout time, and complex maintenance. O architecture provides an innovative solution through Hub Boxes. The FTTR system distributes fiber optic cable to any desired room. Retailers are now selling all necessary components. The Chinese manufacturer Huawei is now also selling its network package for so-called Fiber to the Room. Telhwa's 16 Cores Huawei Pre-connector FTTH Distribution Box offers high-density, reliable fiber management with plug-and-play installation. Request a quote or download PDF.
