

LS-55 Spectrometer

Overview

The LS-55 is a fluorescence/luminescence spectrophotometer with pulsed high pressure Xenon source. It is equipped with monochromators on both the excitation and emission sides and is capable of both excitation (200-800nm) and emission (200-900nm) scans. Ambient temperature 15 °C to 35 °C Relative humidity 75% maximum, non-condensing Environmental conditions for safe operation The LS 55 has been designed to be safe under the following conditions: • Indoor use. Page 9 Warnings and Safety Information. Standard methods include the following: Log in to the LockScreen window using your unique password to unlock the computer. In the taskbar launch VMWare, which will. Except as specifically set forth in its terms and conditions of sale, PerkinElmer makes no warranty of any kind with regard to this document, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose.
