

Large-span cable trays with troughs

Overview

A perforated cable tray—also called a ventilated trough tray —features a solid bottom with regularly spaced ventilation holes and continuous side rails. Ladder cable tray without covers provides for maximum air flow, dissipating heat produced in current carrying conductors. Whether specifying a major new project, refurbishing existing facilities or doing the engineering, procurement and construction (EPC) for your end user, with T&B Cabletray, ABB offers reliable solutions duly conforming to ASTM A123 & ISO 1461 : m. Wide-span cable ladders and trays guide control and power cables in industrial halls, production facilities and power plants or in plant and tunnel construction to exactly where they are needed – flexibly, reliably and absolutely safely. And even large distances can be spanned effortlessly with the. Cable trays - Cable trays, wide span. Large span cable trays can be divided into ladder style, channel style, perforated style with galvanized, powder coated. Our Large span Cable Trays are used extensively in Building, Water Power Industrial Sector, Mall, Railway Station, Metro Station, Airport etc.
