

Low-voltage integrated distribution box

Overview

LV distribution boards, part of the electrical distribution system, securely distribute low-voltage power to facility circuits. Integrated with ACBs and MCCBs, they provide protection from overloads, short circuits, and others. As a pioneer of the power and data distribution of the future, LEONI always keeps. The low voltage integrated distribution box is a distribution device suitable for three-phase AC 50HZ, rated voltage 0. The communication-capable systems and components enable the seamless integration of electric power distribution into automation and energy management systems as well as IoT platforms. It has two or more functions of metering. ABB offers a total ev charging solution from compact, high quality AC wall boxes, reliable DC fast charging stations with robust connectivity, to innovative on-demand electric bus charging systems, we deploy infrastructure that meet the needs of the next generation of smarter mobility.
