

Norwegian Mobile s fiber optic cable

Overview

The company will expand the dark fiber network N0r5ke Viking. N0r5ke Fibre build, own and operate long haul fiber infrastructure between major Norwegian cities, data centres and communication hubs. As a neutral and independent company we lease. The N0R5KE Viking is a 810Km subsea cable between Bergen and Trondheim in Norway, with a crosslink between Molde and Åndalsnes, with 192-fibre-core (96 fiber pairs). The N0R5KE Viking subsea cable is the only direct link between these cities in Norway, fully independent from existing fiber routes -. See the table below for a full overview of recent subsea cable systems in operation, systems under construction and planned systems: The map below shows an overview of existing subsea networks, systems under construction and planned systems: The map below shows an overview of domestic transport. The project involves the construction of a new high-capacity fibre optic cable stretching from Trondheim to Alta. The initiative comes at a time of increasing tension in the High North. We at Norsk Fiberoptikk help customers find the most suitable cable for the right area of use.
