

Revet cable tray settings

Overview

To change the default size of cable trays in Revit: Go to Manage > MEP Settings > Electrical Settings > Cable Trays > Size. Add new custom sizes, activate or deactivate default sizes. The Cable Tray Settings pane contains the following: Use Annot. Adjust Height and Width parameters on the Options bar. This video is related to Revit Electrical cable tray & conduit setting Information In this live video session focused on electrical cable tray and conduit design in Revit, viewers can expect an in-depth exploration of key functionalities and techniques within the software. Here's a brief. However, Cable Trays do have certain limitations in that the channel shape can only be set to a horizontal aspect where the bottom edge runs parallel to its supports. In many applications particularly in the infrastructure space, there is a need to be able to rotate the 'C' channel section so that.
