

SC Fiber Optic Card Splitter

Overview

The interface type is SC/APC, fast and practical. Applicable to home wiring, engineering projects, corporate companies, fiber optic LAN. It has compact structure and good stability, and can be installed in various existing transfer boxes without leaving a lot of. Fiberhome Plug-in Card Splitter 1:8 SC is a high-performance optical splitter designed to divide a single optical signal into eight outputs with exceptional reliability and low insertion loss. This plug-in card format ensures easy integration into fiber optic distribution frames, making it an ideal. Planar wave guide optical separator (PLC Splitter) is an integrated wave guide optical power distribution device based on quartz substrate, which has the characteristics of small volume, wide working wavelength range, high reliability, and good light separation uniformity. It is especially suitable. Optical splitters and couplers split or combine light—distributing signals injected into a single fiber strand to multiple fibers, enabling point to multi-point communication in Fiber To The Home (FTTH) networks based on ITU. T PON standards such as GPON, XGS-PON and new 25 and 50G standards. The 3U panel may be populated with up to 12 modules, the 1U panel with up to 3 modules, and they may be placed in any order in the panel.
