

The switch in the distribution box is lit with a red light

Overview

The presence of the light signifies that the switch controls a single, dedicated, high-current appliance circuit, which is of higher importance than standard lighting circuits. This component features a small neon or LED indicator lamp. Everything else is working great. In troubleshooting I removed all the fuses from the distributor just to see if the fuse lights would not illuminate red and get green power. Any. The power cord connected to the indicator light is not connected properly, resulting in unstable voltage and causing the indicator light to not be bright. Some of my bathroom outlets do not work. What does that mean?

Shoot us a photo of the breaker in question?

Also can you try unplugging EVERYTHING that is. At-a-glance red, green, or white indicators appear in the rocker handle of each circuit breaker as well LED lights on the body of the AFCI, GFCI and AFCI/GFCI circuit breakers. Fuses help protect your electrical system by.
