

# Uruguay Core Switch 200G

## Overview

Powered by the blazing-fast Marvell Teralynx 7 ASIC, it delivers line-rate L2/L3 switching performance up to an impressive 12.8 Tbps, combined with ultra-low latency and unparalleled packet processing capabilities. FS 100/200G PicOS® switches offer high speeds and port densities to meet the network deployment requirements of various scenarios, including core layer applications, and the evolving requirements of enterprise networks. Edgecore Optics delivers high-performance, reliable optical transceivers designed for data centers, AI clusters, and telecom networks. Our solutions ensure scalability, energy efficiency, and seamless interoperability for next-gen connectivity. The transmission distances specified on this page are. Tenda switches have advanced hardware processing capabilities and rich service features to meet users' needs for high-density network access and high-performance aggregation. A new generation of core switches that realize network convergence, virtualization, and flexible deployment can be deployed. This supplier mainly exports to the United Arab Emirates, Ecuador, and Germany, and offers full customization services. They have a high positive review rate of 93. Huli Tong Technology Company limited is. The Asterfusion CX664P-N is a high-density 64-port 200G QSFP56 data center switch engineered specifically for spine architectures.
