

Western European slotted distribution box

Overview

Regular Slotted Containers are the universal shipping box format across European warehousing and distribution networks. Among our distribution boxes you will find the smart and practical solution for your project or business. What do you need?

By checking the box, you consent to the collection and storage of the data you provide for the purpose of contacting and responding to. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. A longer product life is provided by a highly abrasion-resistant polyurethane protected. When only the highest safety, quality, efficiency and endurance are required for electrical power distribution an electrical switchboard solution from CUBIC is the ideal choice. Their standardised construction and EUR-pallet optimised dimensions make RSC boxes the most.

Article Content

DFW European-Style Cable Branch Box

The DFW European-Style Cable Branch Box is an advanced medium-voltage power distribution solution designed to improve the safety, flexibility, and reliability of modern electrical grids.

Production of electrical distribution boards
