

# What is Monaco fire-retardant paint for cable trays

## Overview

Service Coat FR-1 is an acrylic based intumescent coating, designed to increase the fire resistance of fire seals. The Fire Industry Association (FIA) has recently published a technical bulletin addressing the potential hazards of painting cables used in fire detection and fire alarm systems. Effective protection of cable systems around the world: our tried-and-tested FLAMMOTECT-A and DG-CR 0. 7 products are successfully used to protect cables in high-rise buildings, industrial buildings, and offshore facilities as well as in sensitive areas, such as hospitals, airports, production. Electrical cable tray wall penetration firestopping Scope: Firestopping for busway, cable trays, cables, and trunking passing through walls in enclosed electrical installations. Where cables pass through shafts, walls, slabs, or enter electrical panels or cabinets, openings shall be tightly sealed. At RDR Technologies, we offer high-quality fire retardant paint that provides additional protection to electrical cables in buildings. Our products, ideal for contractors, painters, and new businesses, meet fire and building codes, ensuring safety against fire risks in construction projects.

## Article Content

Trunking and cable tray protection

Our range of trunking and cable tray protection products provide effective fire protection for pipes, cables and trunking within floors, walls and ceilings.
