

What is the One-to-Four Light Module

Overview

The Freedompro LB0104-A is a WiFi module that controls 4 independent lights from a single DIN-rail unit, designed for installation in a wall or ceiling junction box. A single 4-light WiFi switch instead of four individual modules: less wiring, a single app configuration, and centralised control of. The DALI light modules have four Light outputs, which are designed for control and power supply of lights with electronic ballasts, LED drivers, and other control gear with DALI interface. It acts as a bridge between your physical lighting fixtures and the smart systems that manage them. With mini, double and triple LED modules available, come and purchase yours today. They are available in different variants, including dimmable modules, RGB modules and those with different light colors such as warm white, neutral white and cool white. The entire assembly acts as a single unit.
