

What kind of wire is next to the cable tray

Overview

Type TC - Tray Cable - (NEC Article 336) -Power and control tray cable type TC is a factory assembly of two or more insulated conductors, with or without associated bare or covered grounding conductors, under a non-metallic jacket. The types of cables, allowed in cable trays, and the wiring methods permitted in cable trays can be found in NEC Section 392. This Section also lists various corresponding NEC Articles which describes the conditions of use, and installation requirements for a particular class or type of. The primary rulebook of cable tray systems is called NEC Article 392. It instructs us on how to construct them, where to locate them, and how to stuff them with wires without using too much. These regulations ensure that the metal or plastic frames that contain the wires are robust enough to ensure. Tray cables (TC) are multi-conductor cables designed and rated for installation in cable trays and raceways or supported by messenger wires.
