

Why are distribution boxes priced as a set

Overview

Unit cost ranges reflect typical wholesale runs between 500 and 10,000 units as these are the most common order sizes for retail and e-commerce brands. Smaller orders tend to skew higher due to setup and tooling costs, while large-scale production benefits from economies of scale. Why are the prices of distribution boxes different?

Have you ever looked at distribution boxes for your building project and wondered why some cost \$50 while others run \$500?

It's not random – the price differences come down to what's actually inside the box, literally and figuratively. The distribution box cost encompasses not only the initial purchase. Rigid boxes are more expensive than folding cartons. Recycled kraft paper is cheaper than premium textured paper. Plastic-free and biodegradable options can also shift costs. The market price is usually between \$10 and \$25, making it a relatively affordable choice. On the Amazon platform, steel distribution boxes are typically used in industrial settings. The average cost of hiring a warehousing & distribution company on Clutch is between \$25-\$49 an hour. However, it's rare that warehousing companies charge based on hourly rates as warehouses serve as central hubs for inventory management, providing a secure and organized space for storing products.
