

Wiring of the time control switch in the distribution box

Overview

To wire a modular timer switch on an electrical panel, follow 3 steps: (1) clip the timer onto the DIN rail and power it through a dedicated 2A circuit breaker with 1.5 mm² wire, (2) wire the dry contact by routing the live wire of the appliance you want to control. The following is the wiring method of the time control switch controlling the load, explained in detail in combination with safety specifications and general steps, applicable to single-phase (220V) and three-phase (380V) scenarios: I. Core Principles and Safety Prerequisites 1. This short video shows step-by-step connections with a simple diagram for easy understanding. more Learn the correct wiring. The Legrand MicroRex BT timer is a compact, no-nonsense 24-hour analog time switch designed to give you reliable daily control over lighting, heating, ventilation, and other fixed loads. A distribution board or distribution box is where the main power supply is distributed to multiple loads.
